Android Configuration

This article describes the steps required to configure the app for android, including updating app name and bundle id (package name).

Application Name, Icon and ID

First thing you will want to do is change application ID and name to something unique to your own brand. There are a few rules this ID should follow:

- It must have at least two segments (one or more dots).
- Each segment must start with a letter.
- All characters must be alphanumeric or an underscore [a-zA-Z0-9_].

Change application ID in android files:

1. [android/app/build.gradle](#)

CONTENTS

Application Name, Icon and ID

Change application ID in android files:

Rename folders in android path based on the new application ID.

Building an releasing the app

Search help center...

My Tickets

webmasters@raivergroup....

3. `android/app/src/main/kotlin/com/vebto/bedrive/MainActivity.kt`
and
`android/app/src/main/kotlin/com/vebto/bedrive/Application.kt`

Rename folders in android path based on the new application ID.

Change

`android/app/src/main/kotlin/com/vebto/bedrive`

to your own application id, for example: if your app id is

`com.my-org.my-app` path will be
`android/app/src/main/kotlin/com/my-org/my-app`

« src » main » kotlin » com » vebto » bedrive

« main » kotlin » com » my-org » my-app

Building an releasing the app

With android configuration is done, app is ready for [building and release](#).
